ABOUT US

DevanSol Global is a trusted partner for engineering solutions, talent supply and global opportunities, connecting India and Europe. We support industries with skilled professionals, technical expertise and reliable services to meet their project and operational needs.

Our focus is on building long-term partnerships through quality, integrity and commitment, helping businesses grow and individuals build successful careers.

Our Mission

To deliver reliable engineering solutions and skilled talent, bridging opportunities between India and Europe.

Our Vision

To be a preferred global partner for engineering services and talent supply, known for excellence, trust and long-term value.

Our Values

- Integrity
- Quality
- Commitment
- People First
- Global Collaboration

Our Strength

- Industry knowledge
- Skilled and reliable workforce
- Strong network in India and Europe
- Focus on quality and compliance
- Long-term partnerships

WHY ENGINEERING OUTSOURCING?

Engineering outsourcing helps companies improve efficiency, reduce costs and access global talent, while maintaining high quality and meeting project deadlines. It enables businesses to focus on their core strengths and achieve sustainable growth.

Cost Efficiency

Reduce operational costs without compromising on quality through optimized resources and offshore delivery.

Access to Skilled Engineering Talent

Leverage a large pool of experienced and qualified engineers with specialized technical skills.

Scalability & Flexibility

Quickly scale your team up or down based on project requirements and business needs.

Faster Project Delivery

Accelerate project timelines with dedicated teams, streamlined processes and 24/7 support across time zones.

Specialized Engineering Expertise

Gain access to domain expertise in design, analysis, documentation and industry-specific solutions.

Focus on Core Business

Free up your in-house resources to concentrate on core business activities, strategy and growth while we handle the engineering support.

India – Europe Advantage

Benefit from a strong combination of cost advantage, skilled talent and cultural alignment, ensuring effective collaboration and long-term partnerships.

OUR ENGINEERING CAPABILITIES

We provide comprehensive engineering solutions that combine technical expertise, global standards and practical experience to support our clients across the entire project lifecycle.

Engineering Outsourcing & Project Support

- Engineering teams and project support
- Design coordination and technical assistance
- Offshore engineering support

Mechanical Engineering

- Mechanical design and engineering
- Piping and equipment
- Fabrication and manufacturing support
- Detailed engineering documents

Civil & Structural Engineering

- Structural design and modelling
- Industrial and commercial structures
- Construction engineering support
- Project coordination and documentation

CAD, BIM & 3D Modelling

- AutoCAD
- Plant 3D
- BIM and 3D modelling
- Technical drawings and modelling
- Clash detection and coordination

WORKFORCE & TALENT SOLUTIONS

Connecting businesses with skilled professionals and helping companies build flexible, reliable teams for engineering and industrial projects.

Skilled Engineering Workforce

- Mechanical engineers
- Civil & structural engineers
- CAD / Plant 3D professionals
- Planning and project engineers

Skilled Industrial Workforce

- Welders
- Pipe fitters
- Fabricators
- Industrial technicians

Recruitment & Talent Support

- Candidate sourcing
- Technical screening
- Skill assessment
- Documentation support
- International recruitment coordination

India - Europe Talent Bridge

- Connecting Indian talent with European opportunities
- Support for international workforce requirements
- Germany and wider European market focus

WHY PARTNER WITH DEVANSOL?

We combine engineering expertise, skilled talent and international understanding to provide reliable support for projects and long-term business growth.

Engineering Expertise

Practical understanding of mechanical, civil, structural and industrial engineering requirements.

Skilled Talent

Access to trained and technically screened professionals for engineering and industrial requirements.

India - Europe Connection

A bridge between Indian engineering talent and European business requirements.

Quality & Reliability

Focus on technical quality, documentation, compliance and dependable project support.

Flexible Support

Solutions that can scale according to project workload, timelines and business requirements.

Long-Term Partnership

We aim to build lasting business relationships rather than provide only short-term staffing.

INDUSTRIES WE SUPPORT

We provide engineering, workforce and project support to a wide range of industries, helping businesses achieve their project and operational goals.

Mechanical & Industrial

Engineering support for mechanical systems, process equipment and industrial projects.

Civil & Infrastructure

Civil, structural and infrastructure engineering support for industrial and construction projects.

Construction

Project support and technical resources for industrial and commercial construction projects.

Automotive

Engineering and technical support for automotive manufacturing and related industrial projects.

Manufacturing

Support for manufacturing facilities, production equipment and industrial documentation.

Energy & Utilities

Engineering and project support for power, oil & gas, renewable energy and utility infrastructure projects.

Engineering & Technology

CAD, Plant 3D, BIM, 3D modelling and engineering documentation support for various industries.

Industrial Projects

Technical support for new installations, expansions, shutdowns, turnarounds and maintenance projects.
